

and Chemistry.

During the first break I met with her friend Muritz. I found out that he loves me, because of the band I love. Foo Fighters, Deep Purple, Pink Floyd, AC/DC, Scorpions... He plays the guitar (as well as I) and loves these music, so he loves me. Logic. But why not, he was nice.

We had lunch in their school canteen (I suppose it should be something like fish fingers, but I'm not sure).

In the afternoon there were program together like whole the ISS, we went to a laser quest. I don't want to write much about it. I was the worst... It's a stupid game. Surely, it wasn't bad, it was fun. Bad was that I had minus one hundred points.

Because it was my birthday next day (Tuesday 13th), we went cook muffins (to school) with Paul and Helena (to Emma's house). It was really fun, Paul was cool. We both loved the muffin dough the most.

Helena and Paul had to go, so we said goodbye and had a dinner. Spaghetti! My favorite food at all. With a homemade tomato sauce. I already loved that family.

Happy birthday, bridges and vine

13. 10. - the best date ever. I woke up and went to bathroom. Emma was already awake and as soon as she caught sight of me, she wished me happy birthday. It wasn't bad at all. I had to smile.

I clothed myself and went to kitchen to have a breakfast. I didn't understand anything the family was talking about (it was German), but suddenly they started singing "Happy birthday to you, happy birthday to you...". It was totally awesome! Fina lighted a candle, everybody wished me happy birthday and we cheerfully continued in eating.

After one and a half hour we were going into class and met Muritz. He clasped me and wished me happy birthday (I wrote he was nice).

In the class Paul clasped me too, wished me happy birthday, actually everybody wished me. Also people I didn't know, Emma just told them I had birthday and they wished me. It was so sweet.

Mr. Mantel (the head of ISS) told us that today we are doing paper bridges and then one wood bridge together. OK, so paper bridge.

Our group was Emma, Me and Niklas and some English student (but English arrived this day in the evening, so we were only three). We made it. I think it was a really good work. Our bridge was totally cool. And this is true, because our bridge won! We got a chocolate stick.

After paper bridges and reviews we tried to make a da Vinci bridge together all students. We had to use only wood, nothing more. We tried for two three hours. We failed. Never mind.

One lunch later we went to vineyard. Vojta's exchange partner (and laser quest winner) Vinz was son of the vineyard owner. His family owned it. Wow.

Vinz showed us all the place (including Würzburger Stein), we could taste their vine (alcohol-free, of course) and we saw how is the vine made. We saw all the machines and... the things.

After this really interesting tour, Franziska, Kika, Emma and I went to Paul's (and Helena's). Paul's mother made a dinner (spaghetti again, oh my God!) and then we wanted to watch some film.

We chose a film named "Nonstop" (luckily with subtitles). It was about a flight, and somebody was killing other passengers and nobody knew who he was and he wanted some money and... I don't know, Franziska's mother arrived, so we had to go. Unfortunately I don't know, who the murderer was. But I have to say, that it was so much better than Given.
